

Opti-Schedule®

Script-based Scheduling

Benefits

- **You decide how to fill slots**
You know how you want to fill the slots and now have software to help you do it
- **Easier for users**
Users do not have to remember the current protocol and any last-minute changes made
- **Ideal for an external call center**
If you utilize an external call center for off-hours or overflow, a custom external script can be used to ensure they are scheduling optimally
- **Evolves with your needs**
Your business needs change over time and your scheduling script will adapt

Features

- **Custom script setup**
A custom script is developed for your specific business needs
- **Invisible protocol enforcement**
The script implements your protocol and you no longer need to rely on users remembering how to do so
- **Errors caught immediately**
No longer can users skip over required fields and enter invalid values
- **Training costs reduced**
Since the script leads the user, new users are instantly productive
